MASS. Mental Health, Sept. 57.

HS 40.6: 971/2

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

February 1971

Comments:

In the report for last month (January) note was made that the active census of inpatients in DMH institutions for the mentally ill had declined less during the current fiscal year than during the corresponding seven month period of the preceding fiscal year. During February, however, the decrease for 1971 was substantially larger than the decrease for 1970 - 231 versus 39 (page 11, Table 9). As a consequence the decline in the active census of inpatients in DMH institutions for the mentally ill since July 1, 1970 became 900 by the end of February 1971, a number quite similar to the decline of 932 for the comparable eight month period of the preceding fiscal year (page 13, Table 11).

Note: Definitions of terms used are found on pages 2 and 7.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERSTable 1. Summary of units of service provided to patients
July 1, 1970 through February 28, 1971

Inpatient units	4,826,697
Family care units	88,832
Day care attendances	79,459
Outpatient visits	140,364
Total	5,135,352

Definitions for Table 1 through 5:

An inpatient unit is one in which the patient was a bed occupant in the institution at the time of its nightly census.

A family care unit is one in which the patient in a family care facility of the institution was a bed occupant at the time of the facility's nightly census.

A day care attendance is a daytime period in which the patient spent several hours under the care of the institution but was not counted as a bed occupant.

An outpatient visit is a face to face session - usually for an hour or less - between the patient and one or more of the institution's supervised mental health workers

During a 24 hour period only one type of unit of service is counted per patient.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

Definitions for Tables 6 through 11:

The active census of inpatients is the count of the actual bed occupants at the time of the nightly census plus inpatients on absence of 7 days or less.

New additions are admissions to inpatient care among patients without past inpatient care in the specified institutions.

For individual institutions, other additions include (1) admissions to inpatient care with past inpatient care in the specified institutions, (2) returns to inpatient care in the institution from visit, family care, placement and unauthorized leave, and (3) direct movements from inpatient care in other mental institutions. Returns from absence of less than 7 days are not included.

Deaths are confined to those occurring in the institutions.

For individual institutions, other removals include (1) outright discharges from inpatient care, (2) movements from inpatient care in the institution to visit, family care, placement, and unauthorized leave, and (3) direct movements to inpatient care in other mental institutions. Movements to absence of 7 days or less are not included.

In group totals, movements directly between mental institutions are excluded from other additions and other removals.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

March 1971

Comments:

The end of March marks the three-quarter point of the fiscal year. At this point in the current year there is indication that, despite the continuing large flow of new patients into inpatient care in the Department's mental hospitals (Table 10), the active census of inpatients in these hospitals has continued to decline (Table 11).

Note: Definitions of terms used are found on pages 2 and 7.

MASSACHUSETTS DEPARTMENT OF MENTAL HEALTH

(unclassified)

JUN 18 1971

University of Massachusetts

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERSTable 1. Summary of units of service provided to patients
July 1, 1970 through March 31, 1971

Inpatient units	5,429,299
Family care units	100,505
Day care attendances	92,553
Outpatient visits	161,090
Total	5,783,447

Definitions for Table 1 through 5:

An inpatient unit is one in which the patient was a bed occupant in the institution at the time of its nightly census.

A family care unit is one in which the patient in a family care facility of the institution was a bed occupant at the time of the facility's nightly census.

A day care attendance is a daytime period in which the patient spent several hours under the care of the institution but was not counted as a bed occupant.

An outpatient visit is a face to face session - usually for an hour or less - between the patient and one or more of the institution's supervised mental health workers.

During a 24 hour period only one type of unit of service is counted per patient.

Of individual institution

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

Definitions for Tables 6 through 11:

The active census of inpatients is the count of the actual bed occupants at the time of the nightly census plus inpatients on absence of 7 days or less.

New additions are admissions to inpatient care among patients without past inpatient care in the specified institutions.

For individual institutions, other additions include (1) admissions to inpatient care with past inpatient care in the specified institutions, (2) returns to inpatient care in the institution from visit, family care, placement and unauthorized leave, and (3) direct movements from inpatient care in other mental institutions. Returns from absence of less than 7 days are not included.

Deaths are confined to those occurring in the institutions.

For individual institutions, other removals include (1) outright discharges from inpatient care, (2) movements from inpatient care in the institution to visit, family care, placement, and unauthorized leave, and (3) direct movements to inpatient care in other mental institutions. Movements to absence of 7 days or less are not included.

In group totals, movements directly between mental institutions are excluded from other additions and other removals.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

April 1971

Comments:

Although the overall active census of inpatients in Massachusetts state institutions for mental disorders continues to decrease (see Table 9 on page 11) this decrease continues to be associated with an increase in the provision by these institutions of other forms of patient care. Below are data on the numbers of family care service units, day care attendances, and outpatient units provided so far this fiscal year compared with the numbers for the corresponding period during the previous fiscal year. The data are taken from Table 1 (page 2) of the April reports for the two years.

	<u>1970</u>	<u>1971</u>
Family care units	99,915	112,087
Day care attendances	97,436	103,771
Out patient visits	147,925	186,496

Note: Definitions of terms used are found on pages 2 and 7.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS**Table 1.** Summary of units of service provided to patients
July 1, 1970 through April 30, 1971

Inpatient units	6,000,936
Family care units	112,087
Day care attendances	103,771
Outpatient visits	186,496
Total	6,398,290

Definitions for Table 1 through 5:

An inpatient unit is one in which the patient was a bed occupant in the institution at the time of its nightly census.

A family care unit is one in which the patient in a family care facility of the institution was a bed occupant at the time of the facility's nightly census.

A day care attendance is a daytime period in which the patient spent several hours under the care of the institution but was not counted as a bed occupant.

An outpatient visit is a face to face session - usually for an hour or less - between the patient and one or more of the institution's supervised mental health workers.

During a 24 hour period only one type of unit of service is counted per patient.

*Of individual institution

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

Definitions for Tables 6 through 11:

The active census of inpatients is the count of actual bed occupants at the time of the nightly census plus inpatients on absence of 7 days or less.

New additions are admissions to inpatient care among patients without past inpatient care in the specified institutions.

For individual institutions, other additions include (1) admissions to inpatient care with past inpatient care in the specified institution, (2) returns to inpatient care in the institution from visit, family care, placement, and unauthorized leave, and (3) direct movements from inpatient care in other mental institutions. Returns from absence of less than 7 days are not included.

Deaths are confined to those occurring in the institutions.

For individual institutions, other removals include (1) outright discharges from inpatient care, (2) movements from inpatient care in the institution to visit, family care, placement, and unauthorized leave, and (3) direct movements to inpatient care in other mental institutions. Movements to absence of 7 days or less are not included.

In group totals, movements directly between mental institutions are excluded from other additions and other removals.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

MAY 1971

Comments:

As the current fiscal year enters its final month, there is indication that this year, like last, will close with an overall decline in the active census of inpatients and with a simultaneous increase in family care, day care and out patient services. Data in Table 11 (page 13) substantiate the statement concerning the decline in inpatient census while data in Table 1 (page 2) in this year's and last year's (q.v.) report for May support the statement concerning the increase in family care, day care and out patient services

Government Documents
Collection
AUG 6 - 1971
University of Massachusetts

Note: Definitions of terms used are found on pages 2 and 7.

MASSACHUSETTS DEPARTMENT OF MENTAL HEALTH
Evaluation, Research and Statistics

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERSTable 1. Summary of units of service provided to patients
July 1, 1970 through May 31, 1971

Inpatient units	6,592,133
Family care units	124,310
Day care attendances	115,886
Outpatient visits	205,720
Total	7,038,049

Definitions for Table 1 through 5:

An inpatient unit is one in which the patient was a bed occupant in the institution at the time of its nightly census.

A family care unit is one in which the patient in a family care facility of the institution was a bed occupant at the time of the facility's nightly census.

A day care attendance is a daytime period in which the patient spent several hours under the care of the institution but was not counted as a bed occupant.

An outpatient visit is a face to face session - usually for an hour or less - between the patient and one or more of the institution's supervised mental health workers.

During a 24 hour period only one type of unit of service is counted per patient.

* Of individual institution

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

Definitions for Tables 6 through 11:

The active census of inpatients is the count of actual bed occupants at the time of the nightly census plus inpatients on absence of 7 days or less.

New additions are admissions to inpatient care among patients without past inpatient care in the specified institutions.

For individual institutions, other additions include (1) admissions to inpatient care with past inpatient care in the specified institution, (2) returns to inpatient care in the institution from visit, family care, placement, and unauthorized leave, and (3) direct movements from inpatient care in other mental institutions. Returns from absence of less than 7 days are not included.

Deaths are confined to those occurring in the institutions.

For individual institutions, other removals include (1) outright discharges from inpatient care, (2) movements from inpatient care in the institution to visit, family care, placement, and unauthorized leave, and (3) direct movements to inpatient care in other mental institutions. Movements to absence of 7 days or less are not included.

In group totals, movements directly between mental institutions are excluded from other additions and other removals.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

June 1971

Comments:

At the end of the current fiscal year, the number of inpatients remaining in Massachusetts state institutions providing inpatient care for mental disorders was 18,817 (Table 7, page 9). The number is significantly smaller than at the beginning of the fiscal year. The decrease amounts to 1720 patients, a reduction very similar in size to that of 1710 which occurred in the preceding fiscal year (Table 11, page 13). This continuing decrease in census has come about in spite of a sustained large annual number of new admissions to inpatient care (see Table 10, page 12).

There is little doubt that the declining census of inpatients is related to the availability and use of alternate types of patient care. The data below (derived from Table 1 of this and last year's June report) show the increase in volume of family care, day care and outpatient service provided by these Massachusetts institutions in 1971 in comparison with 1970:

	1970	1971	Percent change
Family care units	120,906	136,645	+13.0
Day care attendances	118,083	127,431	+ 7.9
Outpatient visits	180,179	218,906	+21.5

Note: Definition of terms used are found on pages 2 and 7.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERSTable 1. Summary of units of service provided to patients
July 1, 1970 through June 30, 1971

Inpatient units	7,157,243
Family care units	136,645
Day care attendances	127,431
Outpatient visits	218,906
Total	7,640,225

Definitions for Table 1 through 5:

An inpatient unit is one in which the patient was a bed occupant in the institution at the time of its nightly census.

A family care unit is one in which the patient in a family care facility of the institution was a bed occupant at the time of the facility's nightly census.

A day care attendance is a daytime period in which the patient spent several hours under the care of the institution but was not counted as a bed occupant.

An outpatient visit is a face to face session - usually for an hour or less - between the patient and one or more of the institution's supervised mental health workers.

During a 24 hour period only one type of unit of service is counted per patient.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

Definitions for Tables 6 through 11:

The active census of inpatients is the count of actual bed occupants at the time of the nightly census plus inpatients on absence of 7 days or less.

New additions are admissions to inpatient care among patients without past inpatient care in the specified institutions.

For individual institutions, other additions include (1) admissions to inpatient care with past inpatient care in the specified institution, (2) returns to inpatient care in the institution from visit, family care, placement, and unauthorized leave, and (3) direct movements from inpatient care in other mental institutions. Returns from absence of less than 7 days are not included.

Deaths are confined to those occurring in the institutions.

For individual institutions, other removals include (1) outright discharges from inpatient care, (2) movements from inpatient care in the institution to visit, family care, placement, and unauthorized leave, and (3) direct movements to inpatient care in other mental institutions. Movements to absence of 7 days or less are not included.

In group totals, movements directly between mental institutions are excluded from other additions and other removals.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

July 1971

Comments:

The first month of the current fiscal year began with a continuation of the decline in active census of inpatients. The decline involved 499 patients this July as contrasted with a decline of 337 patients in July of the preceding year (Table 9, page 11). Both the number of new additions to inpatient care and the number of deaths of inpatient were slightly fewer this July than last (Table 10, page 12).

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

Table 1. Summary of units of service provided to patients
July 1, 1971 through July 31, 1971

Inpatient units	562,059
Family care units	13,666
Day care attendances	8,269
Outpatient visits	15,858
Total	599,852

Definitions for Table 1 through 5:

An inpatient unit is one in which the patient was a bed occupant in the institution at the time of its nightly census.

A family care unit is one in which the patient in a family care facility of the institution was a bed occupant at the time of the facility's nightly census.

A day care attendance is a daytime period in which the patient spent several hours under the care of the institution but was not counted as a bed occupant.

An outpatient visit is a face to face session - usually for an hour or less - between the patient and one or more of the institution's supervised mental health workers.

During a 24 hour period only one type of unit of service is counted per patient.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

Definitions for Tables 6 through 11:

The active census of inpatients is the count of actual bed occupants at the time of the nightly census plus inpatients on absence of 7 days or less.

New additions are admissions to inpatient care among patients without past inpatient care in the specified institutions.

For individual institutions, other additions include (1) admissions to inpatient care with past inpatient care in the specified institution, (2) returns to inpatient care in the institution from visit, family care, placement, and unauthorized leave, and (3) direct movements from inpatient care in other mental institutions. Returns from absence of less than 7 days are not included.

Deaths are confined to those occurring in the institutions.

For individual institutions, other removals include (1) outright discharges from inpatient care, (2) movements from inpatient care in the institution to visit, family care, placement, and unauthorized leave, and (3) direct movements to inpatient care in other mental institutions. Movements to absence of 7 days or less are not included.

In group totals, movements directly between mental institutions are excluded from other additions and other removals.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

August 1971

Comments:

During the current month there were 748 new additions to inpatient care in Massachusetts state institutions for mental disorders. The distributions of these patients according to the mental health region from which they came is given below

Region	Number of new additions
I	76
II	86
III	107
IV	120
V	84
VI	142
VII	98
Out-of-State	22
Unknown	13
Total	748

Government Documents
Collection
DEC 2 1971
University of Massachusetts

The largest number had their address in Region VI. Detail on the 748 patients with respect to the institution to which admitted as well as the region and area from which admitted is found in Table 12 (pages 14-17) while information on their age and region according to type of institution is found in Table 14 (pages 18-19).

Note: Definition of terms used are found on pages 2 and 7.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

Table 1. Summary of units of service provided to patients
July 1, 1971 through August 31, 1971

Inpatient units	1,124,458
Family care units	27,656
Day care attendances	17,229
Outpatient visits	31,595
Total	1,200,938

Definitions for Table 1 through 5:

An inpatient unit is one in which the patient was a bed occupant in the institution at the time of its nightly census.

A family care unit is one in which the patient in a family care facility of the institution was a bed occupant at the time of the facility's nightly census.

A day care attendance is a daytime period in which the patient spent several hours under the care of the institution but was not counted as a bed occupant.

An outpatient visit is a face to face session - usually for an hour or less - between the patient and one or more of the institution's supervised mental health workers.

During a 24 hour period only one type of unit of service is counted per patient.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

Definitions for Tables 6 through 11:

The active census of inpatients is the count of actual bed occupants at the time of the nightly census plus inpatients on absence of 7 days or less.

New additions are admissions to inpatient care among patients without past inpatient care in the specified institutions.

For individual institutions, other additions include (1) admissions to inpatient care with past inpatient care in the specified institution, (2) returns to inpatient care in the institution from visit, family care, placement, and unauthorized leave, and (3) direct movements from inpatient care in other mental institutions. Returns from absence of less than 7 days are not included.

Deaths are confined to those occurring in the institutions.

For individual institutions, other removals include (1) out-right discharges from inpatient care, (2) movements from inpatient care in the institution to visit, family care, placement, and unauthorized leave, and (3) direct movements to inpatient care in other mental institutions. Movements to absence of 7 days or less are not included.

In group totals, movements directly between mental institutions are excluded from other additions and other removals.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

September 1971

Comments:

Examination of Table 11 on page 13 reveals that the decline in active ~~census~~ of inpatient in the institutions for the mentally ill is continuing. At the end of September the census was 187 less than at the beginning of the fiscal year. Although this decline is not as large as that for the comparable period of the preceding fiscal year (283) it is, nevertheless, gratifying in view of the high number of new additions to inpatient care (1957) at these institutions.

NOTE: Definition of terms used are found on pages 2 and 7.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERSTable 1. Summary of units of service provided to patients
July 1, 1971 through September 30, 1971

Inpatient units	1,674,699
Family care units	40,072
Day care attendances	28,096
Outpatient visits	50,393
Total	1,793,260

Definitions for Table 1 through 5:

An inpatient unit is one in which the patient was a bed occupant in the institution at the time of its nightly census.

A family care unit is one in which the patient in a family care facility of the institution was a bed occupant at the time of the facility's nightly census.

A day care attendance is a daytime period in which the patient spent several hours under the care of the institution but was not counted as a bed occupant.

An outpatient visit is a face to face session - usually for an hour or less - between the patient and one or more of the institution's supervised mental health workers.

During a 24 hour period only one type of unit of service is counted per patient.

*Of individual institution

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

Definitions for Tables 6 through 11:

The active census of inpatients is the count of actual bed occupants at the time of the nightly census plus inpatients on absence of 7 days or less.

New additions are admissions to inpatient care among patients without past inpatient care in the specified institutions.

For individual institutions, other additions include (1) admissions to inpatient care with past inpatient care in the specified institution, (2) returns to inpatient care in the institution from visit, family care, placement, and unauthorized leave, and (3) direct movements from inpatient care in other mental institutions. Returns from absence of less than 7 days are not included.

Deaths are confined to those occurring in the institutions.

For individual institutions, other removals include (1) outright discharges from inpatient care, (2) movements from inpatient care in the institution to visit, family care, placement, and unauthorized leave, and (3) direct movements to inpatient care in other mental institutions. Movements to absence of 7 days or less are not included.

In group totals, movements directly between mental institutions are excluded from other additions and other removals.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

October 1971

Comments:

So far this fiscal year the number of new additions to inpatient care has amounted to 2817 patients (Table 10, page 12). This number is substantially smaller than the 3072 observed during the corresponding 4 month period in the preceding fiscal year.

The data below show that the decrease particularly involved patients with addresses in mental health Regions I, VI, and VII and in the age groups 35-64 and 65+ years. It should be noted that the new act relative to the admission, treatment and discharge of mentally ill and retarded persons was not yet in effect during the period being commented on.

NEW ADMISSIONS DURING FOUR MONTHS
July through October

<u>Region</u>	<u>1970</u>	<u>1971</u>
I	319	269
II	361	341
III	437	402

35-64	1041	924
65+	419	323
Unknown	7	13
Total	3072	2817

NOTE: Definition of terms used are found on pages 2 and 7.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

Table 1. Summary of units of service provided to patients
July 1, 1971 through October 31, 1971

Inpatient units	2,239,694
Family care units	52,970
Day care attendances	38,572
Outpatient visits	68,344
Total	2,399,580

Definitions for Table 1 through 5:

An inpatient unit is one in which the patient was a bed occupant in the institution at the time of its nightly census.

A family care unit is one in which the patient in a family care facility of the institution was a bed occupant at the time of the facility's nightly census.

A day care attendance is a daytime period in which the patient spent several hours under the care of the institution but was not counted as a bed occupant.

An outpatient visit is a face to face session - usually for an hour or less - between the patient and one or more of the institution's supervised mental health workers.

During a 24 hour period only one type of unit of service is counted per patient.

*Of individual institution

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

Definitions for Tables 6 through 11:

The active census of inpatients is the count of actual bed occupants at the time of the nightly census plus inpatients on absence of 7 days or less.

New additions are admissions to inpatient care among patients without past inpatient care in the specified institutions.

For individual institutions, other additions include (1) admissions to inpatient care with past inpatient care in the specified institution, (2) returns to inpatient care in the institution from visit, family care, placement, and unauthorized leave, and (3) direct movements from inpatient care in other mental institutions. Returns from absence of less than 7 days are not included.

Deaths are confined to those occurring in the institutions.

For individual institutions, other removals include (1) outright discharges from inpatient care, (2) movements from inpatient care in the institution to visit, family care, placement, and unauthorized leave, and (3) direct movements to inpatient care in other mental institutions. Movements to absence of 7 days or less are not included.

In group totals, movements directly between mental institutions are excluded from other additions and other removals.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

November 1971

Comments:

The rapid decline in the active census of inpatients in Massachusetts mental institutions continues. During the first five months of the current fiscal year the decline has amounted to 663 inpatients, and is in excess of the decline of 265 inpatients seen during the corresponding five month period of the preceding fiscal year (see page 13, Table 11).

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERSTable 1. Summary of units of service provided to patients
July 1, 1971 through November 30, 1971

Inpatient units	2,777,020
Family care units	65,326
Day care attendances	50,097
Outpatient visits	87,862
Total	2,980,305

Definitions for Table 1 through 5:

An inpatient unit is one in which the patient was a bed occupant in the institution at the time of its nightly census.

A family care unit is one in which the patient in a family care facility's nightly census.

A day care attendance is a daytime period in which the patient spent several hours under the care of the institution but was not counted as a bed occupant.

An outpatient visit is a face to face session - usually for an hour or less - between the patient and one or more of the institution's supervised mental health workers.

During a 24 hour period only one type of unit of service is counted per patient.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

Definitions for Tables 6 through 11:

The active census of inpatients in the count of actual bed occupants at the time of the nightly census plus inpatients on absence of 7 days or less.

New additions are admissions to inpatient care among patients without past inpatient care in the specified institutions.

For individual institutions, other additions include (1) admissions to inpatient care with past inpatient care in the specified institution, (2) returns to inpatient care in the institution from visit, family care, placement, and unauthorized leave, and (3) direct movements from inpatient care in other mental institutions. Returns from absence of less than 7 days are not included.

Deaths are confined to those occurring in the institutions.

For individual institutions, other removals include (1) outright discharges from inpatient care, (2) movements from inpatient care in the institution to visit, family care, placement, and unauthorized leave, and (3) direct movements to inpatient care in other mental institutions. Movements to absence of 7 days or less are not included.

In group totals, movements directly between mental institutions are excluded from other additions and other removals.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

December 1971

Comments:

Again this December the active census of inpatients showed a marked decline. The reduction this year was 905 and last year was 1246 (page 11, Table 9). Past experience has shown that a substantial part of the December decline may be due to the temporary placement of patients on visit for the holidays. This has been inferred from the fact that the December census has regularly been followed by a rise in the census for January.

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERSTable 1. Summary of units of service provided to patients
July 1, 1971 through December 31, 1971

Inpatient units	3,319,385
Family care units	78,566
Day care attendances	66,436
Outpatient visits	106,092
Total	3,570,479

Definitions for Table 1 through 5:

An inpatient unit is one in which the patient was a bed occupant in the institution at the time of its nightly census.

A family care unit is one in which the patient in a family care facility of the institution was a bed occupant at the time of the facility's nightly census.

A day care attendance is a daytime period in which the patient spent several hours under the care of the institution but was not counted as a bed occupant.

An outpatient visit is a face to face session - usually for an hour or less - between the patient and one or more of the institution's supervised mental health workers.

During a 24 hour period only one type of unit of service is counted per patient.

*Of individual institution

MONTHLY STATISTICAL REPORT ON ACTIVITIES OF MASSACHUSETTS STATE
INSTITUTIONS PROVIDING INPATIENT CARE FOR MENTAL DISORDERS

Definitions for Tables 6 through 11:

The active census of inpatients in the count of actual bed occupants at the time of the nightly census plus inpatients on absence of 7 days or less.

New additions are admissions to inpatient care among patients without past inpatient care in the specified institutions.

For individual institutions, other additions include (1) admissions to inpatient care with past inpatient care in the specified institution, (2) returns to inpatient care in the institution from visit, family care, placement, and unauthorized leave, and (3) direct movements from inpatient care in other mental institutions. Returns from absence of less than 7 days are not included.

Deaths are confined to those occurring in the institutions.

For individual institutions, other removals include (1) outright discharges from inpatient care, (2) movements from inpatient care in the institution to visit, family care, placement, and unauthorized leave, and (3) direct movements to inpatient care in other mental institutions. Movements to absence of 7 days or less are not included.

In group totals, movements directly between mental institutions are excluded from other additions and other removals.
